

## GREENS

SUSTAINABLE PRACTICES	Completed?	COMMENTS
1 Preserve the local environment -- do not disturb existing flora or fauna or introduce a foreign plant species into a new area.		
2 Rent greens before purchasing live plants.		
3 If greens must be purchased, make a preference for live plants unless synthetics will be reused multiple times.		
4 Obtain live material from existing tree trimming or removal projects.		
5 If purchasing plants, utilize those grown organically and pesticide-free. Use organic mulch and soils.		
6 Donate live plants to local organizations.		
7 Separate green waste and send for composting.		
8 For on set dressing, choose a climate compatible landscape design for the scripted location (e.g. drought resistant species in Southern California).		
9 Follow green practices; reduce, reuse, recycle and shut down (e.g., reduce paper, refill water bottles, shut down equipment).		
10 Search for new green vendors at <a href="http://GreenProductionGuide.com">GreenProductionGuide.com</a> .
